

RallyAround.Us

On November 7th, ninety million Americans will cast ballots. And in 36 states, those voters will elect chief executive officers – governors – who will have the power to ease the financial strain so many of us feel.

Governors can have a significant impact on five pocketbook issues, an impact that can save Machinists hundreds if not thousands of dollars every year. Those issues are **J**obs; **U**tility rates; **I**nsurance premiums; **C**ommuter woes and **E**ducational equity. And that spells **JUICE**.

So, who has the **JUICE** in your state? Who can electrify voters? Who can make real progress on those pocketbook issues?

Answering those questions is up to you. But one thing is clear, if working families don't get involved in these governors' races, then those questions will never be debated. And legislatures will be able to ignore these issues.

So we're asking our members and their families to get involved and help elect governors who can make a real difference in our lives, and in our wallets.

Let these candidates know how you feel, even before the election. A special IAM website – www.RallyAround.Us – gives you a chance to be seen by the whole country.

Log onto RallyAround.Us and add your name to its virtual wall. You will be joining thousands of working men and women who pledge to go vote on November 7th and to vote for a governor who has the JUICE.

Then forward that link to all your friends, relatives, co-workers and neighbors. Get them interested and involved in these governors' races. Ask them to Rally Around Us!

Have you heard?
